

ABSTRACT OF THE DISCLOSURE**DESTINATION DEVICE BILLING ACCORDING TO CALL RECIPIENT**

5 A method, system, and program for billing for service
provided to destination device according to the calling plan of
the individual receiving the call. An authenticated identity for
a callee answering a call placed to a destination device is
received at an intermediary device. The intermediary device then
10 accesses a billing plan for the authenticated identity of the
callee and loads the billing plan for specifying charges for the
call, such that telephone service billed to the callee is
accessible at multiple destination devices.
